HAJIME ISAYAMA

"Attack on Titan" Character Introduction

TITANS

Beings that prey on humans. Not much is known about the mode of life of these creatures, other than that their intelligence is low and they eat humans. Generally, their height varies from about 3 to 15 meters* high, which is why it was thought they wouldn't be able to get over the human-created wall, but one day, the intelligent "Colossus Titan," over 50 meters tall, appeared...

Armin Arlert
Eren and Mikasa's childhood friend. Armin is physically weak and feels that his two friends have protected him since they were children.

Mikasa Ackerman
Mikasa graduated at the top of her training corps. Her parents were murdered before her eyes when she was a child. Afterward, she was raised alongside Eren, whom she tenaciously tries to protect.

Eren Yeager
Longing for the world outside the wall, Eren aims to join the Survey Corps. For some reason, he is now able to turn himself into a Titan.

Grisha Yeager
A doctor and Eren's father. He went missing after the Titan attack five years ago.

A century ago, the human race built three secure concentric walls, each over 50 meters tall.* This successfully secured a safe, Titan-free territory for humans. However, five years ago, a huge Titan, taller than the outer wall, suddenly appeared. After it broke through the wall, many smaller Titans found their way in, forcing the humans to abandon their outer wall. Currently, the sphere of activity of the human race has been reduced to the area behind the second wall, "Wall Rose."
